

Module 1

Climate is Changing

I

What will you find in this module?

► You will be learning about:

- Climate and weather
- Climate change
- How to help protect our environment

► Get ready for the Hands On!

- Let's make a weather forecast report
- Let's prepare for doom!
- Let's be part of the solution

Intermediate

MODULE 1

CLIMATE IS CHANGING

PART 1

What's Generation gap?

LISTENING & WATCHING

a. Discuss the following questions in pairs.

1. How often do you usually check the weather forecast?
2. What are some apps or media sources that you can use to check the weather forecast in your area?
3. Do you think it is useful to check the weather forecast in the city where you live?

Climate or Weather?

Which of the following sentences talks about climate and which one talks about the weather?

- It is sunny and warm in Bogota today.
- It is quite hot and dry in La Guajira.

b. Watch the following video to confirm your answer.

Weather vs. Climate
<https://www.youtube.com/watch?v=6Aigcv7UnTU>

c. Watch the video again. With a partner, make a list of characteristics that describe the weather and another one for climate.

d. Watch the following weather forecast video. Take note of words that Mary Lee uses to describe the weather (e.g.: sunny, clear)

Weather forecast
<https://youtu.be/wlne7j3sl4E>

e. Watch again and tick (✓) the expressions that Mary says in the video.

- ☐ We're tracking a few other systems that will bring the return of wet weather.
- ☐ The possibility of rain decreases Wednesday morning.
- ☐ That unsettled weather will continue through the workweek.
- ☐ Bring your umbrella and be sure to wear a jacket.
- ☐ There is a low pressure system moving towards the east.
- ☐ At this point, the weekend looks dry.
- ☐ Highs will be well above average for this time of year.

f. Now answer the following questions.

1. What region of California is Mary reporting on?
2. What are the average temperatures in the South Bay area that morning?
3. What is the exact temperature of San Francisco?
4. What will the weather be like on Tuesday night at 9pm?
5. What is the weekend forecast for the Inland area?
6. What is Monday's temperature in the Bay?

g. Group Activity: In small groups, check the weather forecast for the week!

Use a website or a weather app on your cellphone to check the weather forecast for the next three days in a city of your preference. Then, complete the chart below by including the days of the week, the temperature, and the weather conditions for each day.

Suggested apps/websites: The Weather Channel, weather.com, AccuWeather, Weather Timeline.

City:			
Day of the week			
Temperature (high, low)			
Weather conditions			

h. Discuss the weather with a partner by answering the following questions.

Use the *Useful expressions about the weather* on the right.

1. What is the weather like today?
2. What was it like yesterday?
3. What is the climate like in your hometown?
4. What's your favorite type of weather?
5. What is your favorite climate?
6. Does the weather affect your mood?
7. What do you like doing when the weather is bad?
8. What kind of weather do you think is the best and worst for camping - napping/sleeping - hiking - cycling - reading - studying - going to a picnic - driving?

➔ **GO TO HANDS ON Activity 1 - Make your own weather forecast.**

LISTENING

Image: <https://unsplash.com>

Useful expressions about the weather

What's the weather like right now?

It's a little chilly out. / It's nice and warm. / It's snowing. / It's rainy and windy.

Do you like the weather we're having today?

No, it's a little chilly out. / it's too hot. / Yes, it's really nice out today.

What kind of weather do you like most?

*Warm. Why?
It's not chilly and it's not hot.*

How was the weather yesterday?

It was hot and humid (cool, rainy, foggy, snowy)

What's the weather going to be like tomorrow?

Do you think the weather will be good this weekend?

What is the climate like you your country?

*The weather is usually ... and ... in my country/city.
In my country/city, the weather is always...*

a. Look at the photo on the left and discuss the following questions in small groups.

1. What is happening in the image?
2. How are people in your country notified about these types of events?
3. How can people prepare for events such as this?

What is a PSA?

A *public service announcement* or PSA is an advertisement that is broadcasted for free with the objective of increasing public awareness about a social issue or changing public attitudes and behaviors towards a social issue. Traditionally, they were broadcast via radio in the U.S. but now they are broadcast via radio, television and the internet.

b. Listen to a PSA and answer the questions below.

1. Where is the first speaker?
2. Who is the intended audience of the PSA?
3. What is the PSA trying to persuade people to do?
4. How can the listener get more information about the topic discussed in the PSA?

c. Listen to the PSA again. Match the phrases to the definitions based on the context.

PHRASE	DEFINITION
1. be kind of slow ()	a. to happen suddenly and have a harmful or damaging effect
2. to pick up ()	b. more than you could have imagined
3. to catch off guard ()	c. to increase
4. to strike ()	d. to not be very busy
5. in "someone's" wildest dreams ()	e. to happen to someone or something
6. become of ()	f. to be unprepared for something

a. Complete the paragraph with one of the phrases from the previous activity. Adjust any phrase as necessary to make it grammatically correct.

The weather forecast stated that the hurricane winds are (1)_____ speed. The storm is now a Category 5. Although barrier beaches have been vanishing for years, never (2) _____ could the people have imagined the level of flooding that the storm surge is causing. Many farmers are concerned about the flooding and wonder what will (3) _____ their farms and way of life. Additionally, they worry that water-borne diseases will (4) _____ after the flood. Although they were warned a week ago, many people in the community still feel (5) _____ by the severity of the storm. Several of the older community member have commented about the increasing frequency and intensity of hurricanes over the past two decades. While they have strongly denied climate change for years, many are starting to believe it is real because they are experiencing its impacts.

VOCABULARY & READING

➔ **GO TO VOCABULARY REFERENCE** *The environment*

a. Discuss the following questions in pairs.

1. How would you describe the health of the Earth today?
2. How do you think human activity has affected the health of the Earth?
3. What do you think will be some effects of human activity on the Earth's health in the future?

b. Read the following article.

CLIMATE CHANGE: Impacts on Society

Image: <https://www.thecoastnews.com>

Climate change is affecting the American people in many ways. Impacts related to climate change are evident across regions and in many sectors important to society—such as human health, agriculture and food security, water supply, transportation, energy, ecosystems, and others—and are expected to become increasingly disruptive throughout this century and beyond.

Climate change affects human health and wellbeing through more extreme weather events and wildfires, reduced air quality, and diseases transmitted by insects, food, and water. Climate effects on agriculture have been increasing and are projected to become more severe over this century, a trend that would diminish the security of America's food supply. Surface and groundwater supplies in some regions are already stressed, and water quality is getting worse in many areas, in part due to increasing sediment and contaminant concentrations after heavy downpours.

In some regions, prolonged periods of high temperatures associated with droughts contribute to conditions that lead to larger wildfires and longer fire seasons. For coastal communities, sea level rise, combined with coastal storms, has increased the risk of erosion, storm surge damage, and flooding. Extreme heat, sea level rise, and heavy downpours

are affecting infrastructure like roads, rail lines, airports, port facilities, energy infrastructure, and military bases.

The capacity of ecosystems like forests and wetlands to reduce the impacts of extreme events like fires, floods, and severe storms is being exceeded. The rising temperature and changing chemistry of ocean water is combining with other stresses, such as overfishing and pollution, to alter marine-based food production and harm fishing communities.

Some climate changes have had beneficial effects for specific sectors or regions. For example, current benefits of warming include longer growing seasons for agriculture and longer ice-free seasons for shipping on the Great Lakes. At the same time, however, longer growing seasons, along with higher temperatures and carbon dioxide levels, have increased pollen production, intensifying and extending the allergy season. Longer ice-free periods on the Great Lakes can result in more lake-effect snowfalls.

Today, these and other aspects of climate change are having increasingly complex and important impacts on the American economy and quality of life.

Glossary

- downpour:** a heavy fall of rain.
- storm surge:** an abnormal rise in the level of the sea along a coast caused by winds.
- snowfall:** snow produced due to the humidity evaporated from a lake.

Source: <https://www.globalchange.gov>

c. Discuss in pairs the following questions.

1. What are the potential effects climate change has on the national and global economy and in other important sectors of society?
2. How can wildfires, reduced access to water, and diseases have negative impacts on human life?
3. What is an example of an ecosystem that is “exceeding capacity”?
4. Do you think longer growing seasons are a negative aspect of climate change in some regions?
5. What are some examples of how can climate change be positive in certain cases?

d. With a partner, complete the cause-effect chart with examples from the text. When you finish, compare it with another pair.

CAUSE		EFFECT
	→	
	→	
	→	
	→	

e. In pairs or small groups, think of a few examples of human activities in Colombia that are affecting or have affected in the past the environment and discuss the following questions.

1. What has been the effect of that activity so far?
2. What are possible future effects?
3. What are some steps that the government and individuals can take today to reduce the possible future effects?

USE OF ENGLISH TIP

Talking about the present

Read the following extracts from the text in 1b.

1. Climate change is affecting the American people in many ways.
2. Climate change affects human health and wellbeing through more extreme weather events and wildfires.

Which sentence talks about...

- a fact or something that is always true. ____
- an event that is happening around these days. ____

Go to the Use of English Reference for more information and practice

READING

a. Read the article below. Underline the words and expressions that you don't know.

What Drives Doomsday Preppers

By Michele Moses. November 13, 2018

Several years ago, a New York City firefighter named Jason Charles read the novel "One Second After," by William R. Forstchen, and decided to change his life.

In the book, an electromagnetic pulse goes off and sends the United States back into the Dark Ages; in its foreword, Newt Gingrich writes that this technology is not only real but terrorists know about it. "It was pretty much a green light for me to start preparing," Charles says. The latest episode of The New Yorker's "Annals of Obsession" video series centers on doomsday preppers—people who aim to equip themselves with the skills and materials they would need to survive a world-ending calamity. Charles is now the organizer of the group N.Y.C. Preppers, which teaches people who live in cities how to take care of themselves. He says that he has collected enough supplies that, if the worst happened, he would be able to survive for a year and a half without help.

Robyn Gershon, a public-health professor at N.Y.U. who specializes in disaster preparedness, concedes that, in the age of global warming, it is not so crazy to be thinking about the apocalypse. According to the "push-pulse theory of extinction"—a theory created to explain the mass death of the dinosaurs—any strain on an ecosystem leaves the species in

it far more vulnerable to cataclysm. Today, climate change and rising sea levels put us at greater risk of being wiped out by a disastrous event, such as a pandemic or a supervolcano.

Revealingly, however, many doomsday preppers' fears are not based on speculative, sci-fi-style catastrophes but on disasters that have already happened. "Watch a documentary about [hurricane] Katrina. Look at something about [hurricane] Sandy, years afterwards. Look at Puerto Rico right now," Scott Bounds, a member of N.Y.C. Preppers, says. "You have to realize that people are not going to come take care of you. You really have to be able to take care of yourself." Judging by that rationale—"people are not going to take care of you"—the impulse to prepare is a response to governmental failings and apocalyptic fantasies.

Glossary

drive (v): motivate

doomsday: a time of catastrophic destruction and death.

preppers: people who prepare for extreme natural or nuclear disasters.

foreword: commentary by another author placed in the beginning of a book.

Adapted from: <https://www.newyorker.com>

b. With a partner, look up or ask the professor the words and expressions you do not know.

c. Answer the following reading comprehension questions.

1. What was the catalyst for Jason Charles to become a Doomsday Prepper?
2. What is a Doomsday Prepper?
3. What does the NYC Preppers organization do?
4. Why is it reasonable to think about the apocalypse, according to Robyn Gershon?
5. Why are we increasingly vulnerable to cataclysm?
6. What are Doomsday Preppers fears based on?
7. What drives people to prepare for themselves?

d. Discuss the following questions with a partner. With a new partner, discuss your opinion.

1. Do you think you will become a doomsday prepper?
2. Do you think these people are unreasonable or irrational?

➔ **Go to HANDS ON Activity 2 - Do or Die!**

SPEAKING

a. Discuss in pairs these questions.

1. How can you help to protect the environment?
2. Do you recycle at home?
3. Do you use a bicycle to commute?

b. How GREEN are you? Complete the quiz on the next page to find out.

1. Do you sort out glass, paper, plastic, bottles, and cans? ☐ A. Yes, always ☐ B. Sometimes ☐ C. Never	8. Do you switch off other electronic devices at night (TV, computer, etc.) ☐ A. Yes, always ☐ B. Sometimes ☐ C. Almost never
2. Do you buy fair trade products or organic or local food. ☐ A. Yes, always ☐ B. Sometimes ☐ C. Never, it's too expensive	9. Do you put on warmer clothes when it is cold instead of putting on the heating? ☐ A. Yes, always ☐ B. Sometimes ☐ C. Never! I prefer the heating.
3. Do you use your own shopping bags? ☐ A. Yes, always ☐ B. Sometimes ☐ C. Never, it's too expensive	10. Do you take showers instead of baths? ☐ A. Yes, always ☐ B. Often ☐ C. Never
4. Do you recycle light bulbs and used batteries? ☐ A. Yes, always ☐ B. Sometimes ☐ C. Never	11. Do you close the tap while you brush your teeth? ☐ A. Yes, always ☐ B. Sometimes ☐ C. Never, I don't even think about it.
5. Do you always dispose of garbage in a proper way? ☐ A. Yes, always, of course! ☐ B. Sometimes ☐ C. Almost never	12. Do you leave the refrigerator door open while you cook? ☐ A. No, never! I always close it. ☐ B. Sometimes ☐ C. Yes, it often happens.
6. Do you switch off the lights when you leave a room? ☐ A. Yes, always ☐ B. Sometimes ☐ C. Never	13. Do you use public transportation, ride a bike, or walk when possible? ☐ A. Yes, always ☐ B. Sometimes ☐ C. Never
7. Do you pick up other people's litter? ☐ A. Yes, always ☐ B. Sometimes ☐ C. Never	14. Do you have compost at home? ☐ A. Yes (2 pts.) ☐ B. No (0pts.)

Results

Check the number of points you have and see if you are GREEN!

A → 2 points

B → 1 point

C → 0 points (except question 14)

- From 22 to 28: Congratulations! You are making an excellent effort to help save our planet. Keep up the good work!
- From 13 to 21: Well, you can do better. But good effort! The environment is clearly not your priority, but it should be!
- Below 12: Oh, no! That's just not okay. You should definitely do a lot more to take care of planet Earth! You've got a lot to learn!

Discuss your results. How do you compare to the rest of your classmates? Are you happy with your individual score?

➔ **Go to HANDS ON Activity 3 - Let's Be Part of the Solution**

Module 1 Hands On

ACTIVITY 1

MAKE YOUR OWN WEATHER FORECAST!

In pairs or groups of three, choose any place in the world to create your own weather forecast. Create a 2-3 minute presentation. Use the questions below as a guide. Be creative!

Remember: Incorporate the new vocabulary and expressions from this module to make your presentation detailed and interesting!

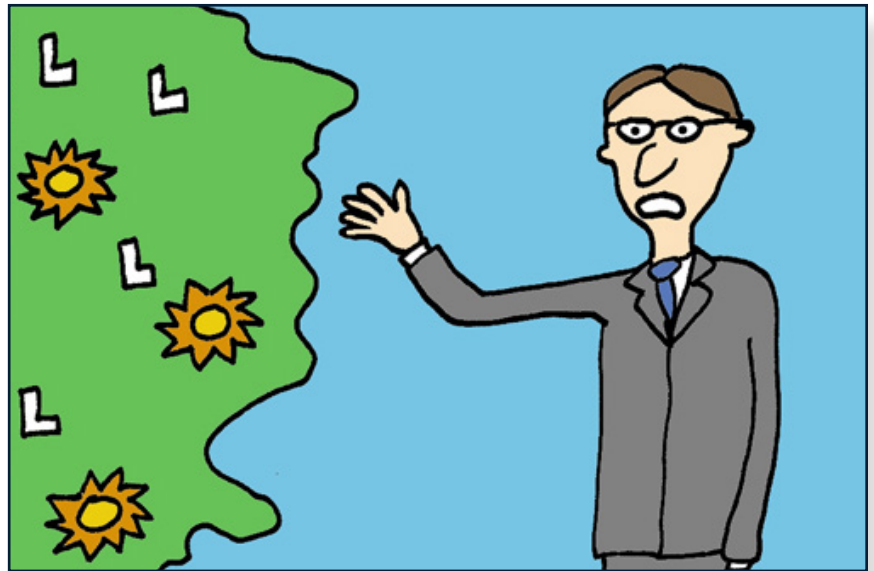

Image: <https://www.mycartoonthing.com>

Useful questions...

- » What time of day is it? (*to indicate what type of greeting you should use...good morning / afternoon*)
- » Where are you?
- » How is the weather today?
- » What can we expect the weather to be like?
- » How has the weather been?
- » Why has the weather been this way?
- » How has the weather affected daily life in this area?

Vote for your favorite!

Discuss with your partner which group presented the best weather report. Once you decide, it's time to cast your vote!

Module 1 Hands On

ACTIVITY 2

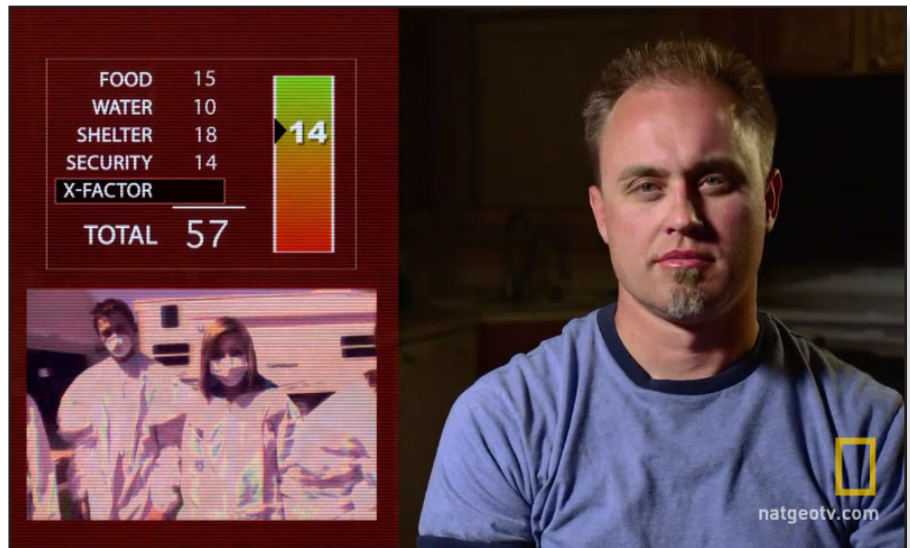

DO OR DIE!

Step 1. Watch the video about Domsday Preppers.

Step 2. Your turn! Prepare for Doom!

In a small groups of 3 or 4, you will be assigned a catastrophic scenario. You must prepare a plan on how to survive it. What would you do for food? Water? How will you protect yourself and your group? What special skills or materials will you have to give you an advantage?

Each group will be scored on their preparation plan by the other groups.

Video: [Practical Preppers Scorecard: Braxton Southwick](#)

Suggested examples: nuclear war, water war/severe drought in South America, massive earthquake in the Andes, terrorist poisoned country's food supply, massive hurricanes in the northern coast of Colombia.

Step 3. You're going to give your opinion about the other groups' survival plans by completing the **Prepping Scorecard**. Give a score from 1 to 20 for each section. Will they survive? **Note:** On a separate sheet, copy the chart if there are more than six groups of preppers are presenting.

	Group 1	Group 2	Group 3	Group 4	Group 5	Group 6
Food						
Water						
Security						
Shelter						
X-Factor						
Total						

ACTIVITY 3

LET'S BE PART OF THE SOLUTION!

In a small group, choose one impact of climate change and research information online to complete the chart. Include information that discusses what individuals and countries are doing to mitigate the problem. Then, outline a policy proposal to a Colombian senator to address an issue that concerns your group the most.

You will present your policy proposal in a five minute presentation. Use the outline in the Brainstorm Activity to guide your presentation (Go to [ACADEMIC SPEAKING: Organizing an Oral Presentation first](#)).

Problem/Impact of Climate Change: _____

What can you do better as an individual?	
What is the Colombian government already doing?	What are organizations in Colombia already doing?
What's the international community doing?	
Policy proposal for the Colombian government to address climate change	

Module 1

Academic Production

ACADEMIC SPEAKING - Organizing a presentation

GENERAL PRESENTATION FORMAT:

1. Greet the audience
2. Hook the audience
3. Introduce topic
4. Outline the presentation
5. Present your arguments with support (strongest point first, weakest point last)
6. Conclude the presentation

It is important to give your listeners verbal signals as you move from one part of the presentation to another to let them know where you are in it. These signals are called discourse markers.

TYPES OF DISCOURSE MARKER

- » Introduce topic (**I**)
- » Outline presentation (**O**)
- » Finish a section (**F**)
- » Start a new section (**S**)
- » Conclude presentation (**C**)

Write the letter indicated beside the examples of the types of discourse marker.

- | | |
|---|---|
| 1. ☐ We'll move on to ... | 9. ☐ First of all, I'll ... and then I'll go on to ... Next ... Last |
| 2. ☐ To sum up ... | 10. ☐ I'm going to talk about |
| 3. ☐ There are a number of points that I'd like to make. | 11. ☐ Finally, let me remind you of some of the issues we've covered ... |
| 4. ☐ We've looked at... | 12. ☐ The next issue that I would like to focus on ... |
| 5. ☐ My talk today is concerned with ... | 13. ☐ In short, ... |
| 6. ☐ Let's begin by ... | 14. ☐ The subject of my talk is ... |
| 7. ☐ Now, let's discuss ... | 15. ☐ That's all that I'm going to say about ... |
| 8. ☐ So much for ... | |

Adapted from <http://www.bbc.co.uk/worldservice/learningenglish/business/talkingbusiness/unit3presentations/4tips.shtml>

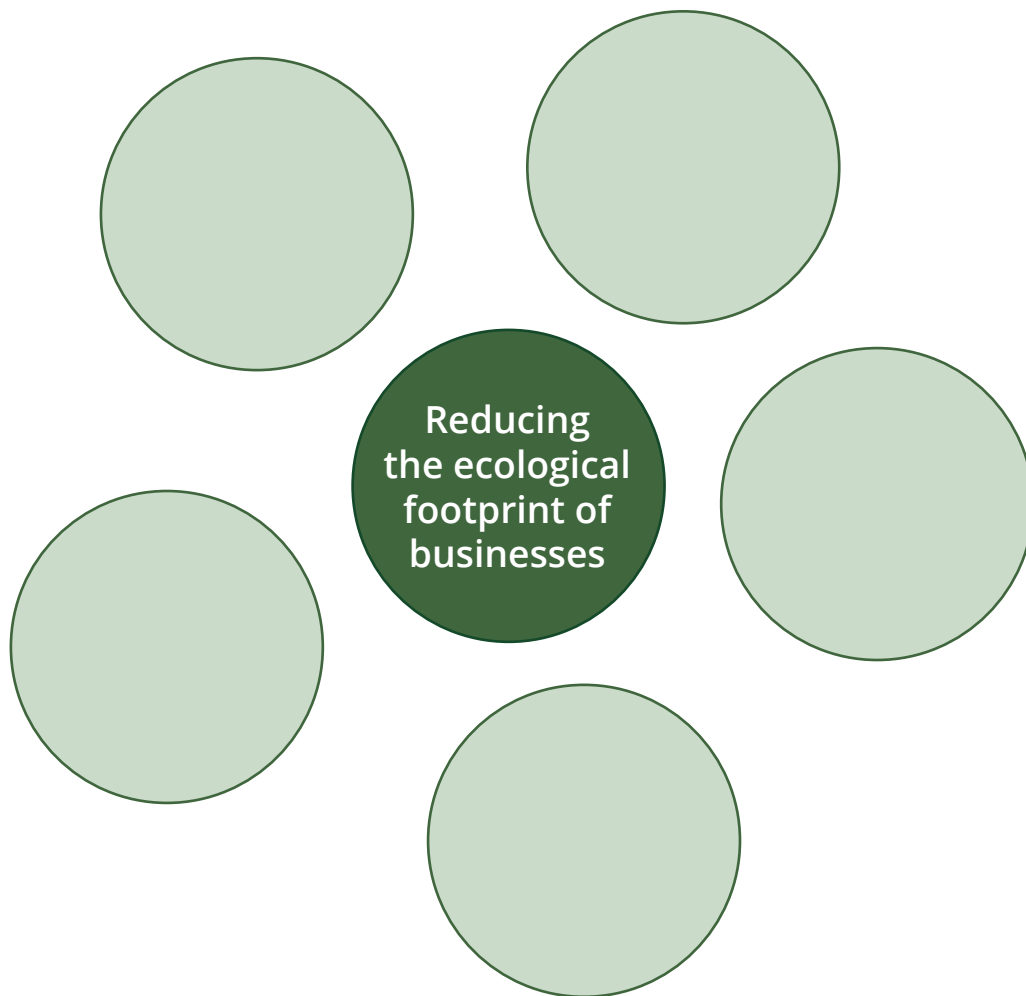

Module 1

Academic Production

PRACTICE

Look at the brainstorm bubble below. Organize the content into a possible speech outline with the appropriate discourse markers. Compare your answer with another group.

Brainstorm bubble for solutions to reducing ecological footprint of businesses.

OUTLINE FORMAT

Presentation sections	Example
Greet the audience	<i>Good morning everyone. My name is Alexandra Ramirez....</i>
Hook the audience	
Outline presentation	
Present points (strongest → weakest)	
Conclude the presentation	

VOCABULARY REFERENCE

THE ENVIRONMENT

global warming pollution aerosol cans protect
industrial waste factory smoke natural resources
destroys the environment harmful environmentally-friendly
car exhaust fumes destruction of the rainforest

Many people are worried about the state of the planet, and the effects of ¹ global warming (an increase in world temperatures, caused by an increase in carbon dioxide around the Earth). A growing human population is putting pressure on the Earth's ² _____, (things that exist in nature and can be used by people, for example oil, trees, etc.) like food and water. Also, a lot of human activity is ³ _____ (causes damage), either because it causes ⁴ _____ (dirty air, water or land), or because it ⁵ _____

(damages the air, water and land so badly that it might not recover). Some of the most common causes of damage are:

- ⁶ _____ (chemicals and unwanted materials which factories throw away)
- ⁷ _____ and ⁸ _____
- ⁹ _____ (which contain CFCs – a chemical which damages the ozone layer)
- ¹⁰ _____ – which increases the amount of carbon dioxide in the atmosphere.

Environmentalists try to ¹¹ _____ the environment (keep it safe from harm) by encouraging people to change the way they live (recycling more, using ¹² _____ or 'green' products which do not damage the environment, wasting less, etc.) and persuading governments to take environmental issues more seriously.

B Complete the table with words from the text in Exercise 1A.

noun	verb
¹ _____	destroy
protection	² _____
³ _____	pollute
⁴ _____	damage
waste	⁵ _____

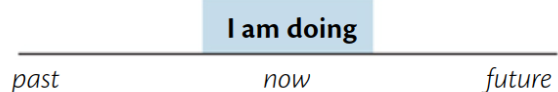

USE OF ENGLISH REFERENCE

PRESENT SIMPLE AND PRESENT CONTINUOUS

COMPARE:

Present continuous (I am doing)

We use the continuous for things happening at or around the time of speaking.
The action is not complete.

- ☐ The water **is boiling**. Can you turn it off?
- ☐ Listen to those people. What language **are they speaking**?
- ☐ Let's go out. It **isn't raining** now.
- ☐ 'I'm busy.' 'What **are you doing**?'
- ☐ I'm **getting** hungry. Let's go and eat.
- ☐ Kate wants to work in Italy, so she's **learning** Italian.
- ☐ The population of the world **is increasing** very fast.

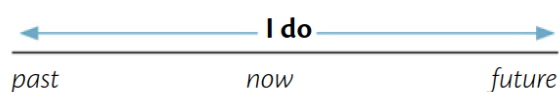

We use the continuous for *temporary* situations:

- ☐ I'm **living** with some friends until I find a place of my own.
- ☐ A: You're **working** hard today.
B: Yes, I have a lot to do.

See **Unit 1** for more information.

Present simple (I do)

We use the simple for things in general or things that happen repeatedly.

- ☐ Water **boils** at 100 degrees Celsius.
- ☐ Excuse me, **do** you **speak** English?
- ☐ It **doesn't rain** very much in summer.
- ☐ What **do** you usually **do** at weekends?
- ☐ I always **get** hungry in the afternoon.
- ☐ Most people **learn** to swim when they are children.
- ☐ Every day the population of the world **increases** by about 200,000 people.

We use the simple for *permanent* situations:

- ☐ My parents **live** in London. They have lived there all their lives.
- ☐ Joe isn't lazy. He **works** hard most of the time.

See **Unit 2** for more information.

I always do and I'm always doing

- I **always do** (something) = I do it every time:
- I **always go** to work by car. (not I'm always going)

'I'm always doing something' has a different meaning. For example:

I'm always losing things = I lose things very often, perhaps too often, or more often than normal.

More examples:

- You're **always playing** computer games. You should do something more active. (= You play computer games too often)
- Tim is never satisfied. He's **always complaining**. (= He complains too much)

USE OF ENGLISH REFERENCE

PRESENT SIMPLE AND PRESENT CONTINUOUS

- a. A climatologist is visiting an area in California and is having a conversation with a local farmer. Put the verbs in present simple or present continuous.

Climatologist: Morning, ma'am. How are things? How _____ (be) the weather in Central California?

Farmer: Good morning, how's it going? The weather is quite unusual these days. The weather is usually mild and pleasant, but lately wildfires and droughts _____ (affect) my crops. I _____ (start) to worry because my neighbor's farm was destroyed by the fires last week.

Climatologist: Hmm, yeah, that's tough. These are some of the negative effects of climate change. I'm going to speak with your neighbors later today. Your account is consistent with what I _____ (hear) from other farmers in the area. Are you _____ (save) water?

Farmer: Yes, currently I _____ (try) to save water, but I'm afraid it's just not enough. It _____ (not rain) and we _____ (not harvest) enough avocados and almonds to meet the demand.

Climatologist: I _____ (advise) your neighbors to save as much water as possible. Unfortunately, this is all we can do. However, I also suggest that you avoid using pesticides since they're extremely flammable.

Farmer: Thanks for your help and advice.

Climatologist: Of course. I wish we were speaking under better conditions. Good luck and stay safe.

- b. A man is travelling and writes an email to his loved one. Write the verb in the present perfect simple or the present perfect continuous.

Hey Patrick,

I'm sorry for not writing sooner. I _____ (travel) all over the Caribbean since last month and _____ (not have) consistent internet service. I _____ (look) for a reliable internet cafe for days, and finally I think I _____ (find) it. I _____ (be) to Jamaica, Cuba, Haiti and the Dominican Republic. It is very beautiful in the Caribbean. For the most part, the weather _____ (be) nice but for the past two days it _____ (rain) all day, every day. I _____ (not be) able to swim or explore outside much because of the rain. When we went to Jamaica a few years ago, it was hot and dry, but I _____ (notice) how wet it has been this time around. Also I _____ (work) for a local hostel for the last couple of weeks, and that has been really fun. It has been great to be around fellow travellers and I _____ (practice) my French with some guests. My level really _____ (improve)!

Anyway, I hope you are able to visit me soon.

Love,

Grant
